Part III DETAILED ACTION

*** This office is in response to filing of the application on October 02, 2003.

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

Group I, Claims 15-17, drawn to a device, classified in Class 257, subclass 345.

Group II, Claims 1-14, drawn to a method, classified in Class 438, subclass 305.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (M.P.E.P. § 806.05(f)). Unpatentability of the group I invention would not necessarily imply unpatentability of the group II invention, since the device of the group I invention could be made by process material different than those/that of the group II invention. For example: instead of implanting ions, growing a layer including ions or diffusing ions into the substrate.

Because these inventions are distinct for the reasons given above and have acquired a separate status as shown by the above different classifications and as given in the above examples, the fields of search are not co-extensive and separate examination would be required, restriction for examination purposes as indicated is proper.
